LSC

LEGAL SERVICES CORPORATION
Technology Initiative Grant Program
Client Web Site Evaluation System

SUMMARY ASSESSMENT &
GRANTEE EVALUATION FEEDBACK

INSTRUCTIONS

NOTE: Completing this instrument is optional.

The Summary Assessment and Grantee Evaluation Feedback instrument seeks information in two areas:

1. Grantees' overall analyses of the evaluation data generated from the Web-based Stats, Outreach Checklist, Community Provider Survey, and the Access Challenges Assessment instruments.

2. Grantees assessment of LSC's Client Web Site Evaluation System.

LSC seeks only narrative information on this instrument.

Summary Assessment
The information generated by the instruments focused on discrete Web site elements may provide grantees with more general insights about their Web sites. An integrated analysis of the full range of data by the discrete instruments can produce perspectives that the individual instruments by themselves cannot provide. LSC encourages grantees to conduct such integrated analyses. LSC also requests grantees to share whatever analytical conclusions they reach by completing the Summary Assessment portion of this instrument.

Evaluation Feedback
This evaluation system is a work in progress. LSC seeks grantees' feedback about the relative utility of the system and its different components and the ways it can be improved. This information will be indispensable as LSC develops changes that can improve the effectiveness of this evaluation system and as it develops other TIG program evaluation mechanisms.

For questions or additional information, please contact Bristow Hardin, LSC, Office of Program Performance, 202-295-1553, hardinb@lsc.gov
